UVA/UVB  
PA++

## Level of UVB protection by SPF

The chart below shows the percentage of UVB rays that are blocked by different SPF levels.

**Daily Use** products are intended to protect consumers from incidental sun exposure that occurs in short periods of time. In order to qualify, a product must be at least SPF 15, and be supported by acceptable testing data for UVA and UVB protection, phototoxic reactions and contact irritancy.

**HandDrink®**  
Hand Cream  
**SPF 15 Broad Spectrum**  
UVA/UVB  
PA++

**Glow Time®**  
Full Coverage Mineral BB Cream
